

**CONF**

FULLY AUTOMATED CONFERENCE BROADCASTING

**multiCAM**  
systems

# CONF

## BROADCAST YOUR MEETING AT THE NEXT LEVEL

- City Councils, Local Gov.
- Corporate
- Assemblies
- Mid-size meeting rooms

**multiCAM**  
systems

# AI DRIVEN SYSTEM

multiCAM CONF uses the power of Artificial Intelligence to automate video production in audio conferencing systems.

It is as though we took the brain of a director to create dynamic and professional video with no human intervention.

**multiCAM**  
systems

# VIDEO FOLLOWS AUDIO

multiCAM CONF uses metadata and audio detection to **select the best camera shot and focus the speaker.**

AI methods gives diversity and reals detection to **select the best camera shot and focus the speaker.**

# EASY-TO-SETUP

Once system is connected,  
it takes 30 min. to configure.

1. Workspace design
2. Delegate unit selection
3. Camera preset(s) for each microphone

# CONF

# SOFTWARE & HARDWARE

**CONF**

## A large choice of server boxes

- up to 4x NDI / IP sources
- up to 4x SDI sources
- up to 8x SDI sources

Expand number of cameras by using a video matrix controlled by multiCAM

# DEVICES COMPATIBLE
