RADIO

FULLY AUTOMATED VISUAL RADIO

multiCAM SYSTEMS

RADIO

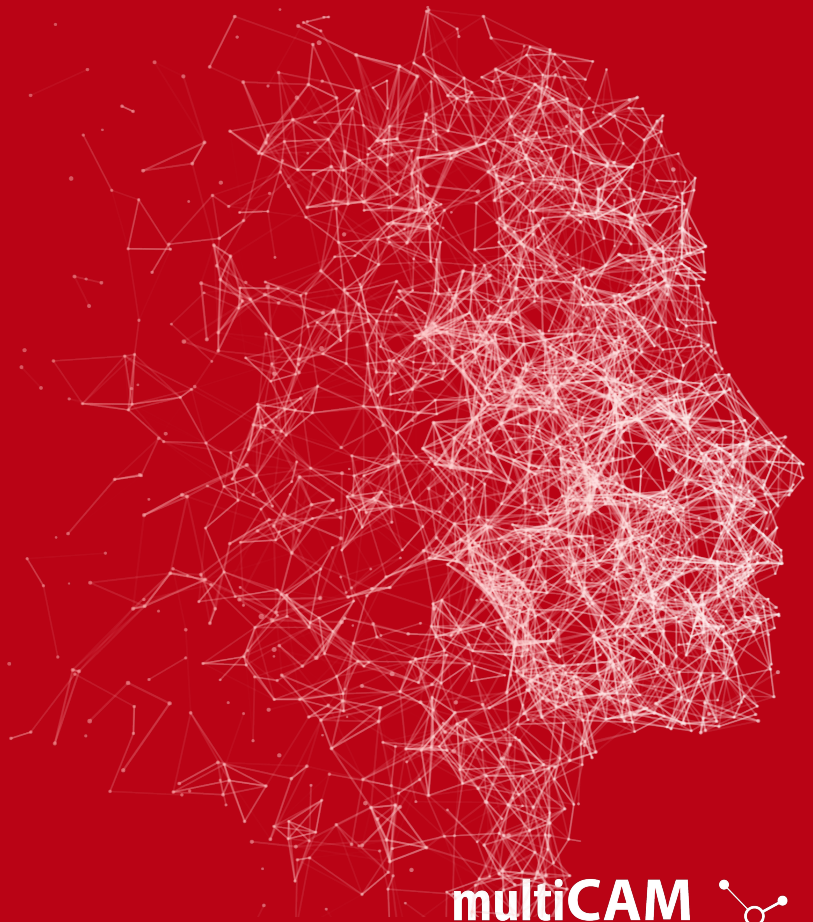
ALL-IN-ONE SOLUTION FOR YOUR RADIO STATION

- Automated camera control and switching
- Integrated with major Audio Consoles
- Integrated with major Playout Softwares
- Video player
- Graphics and character generator
- Live Streaming
- HD Recording
- Publishing to video platforms and social media

AI DRIVEN SYSTEM

multiCAM RADIO uses the power of Artificial Intelligence to automate video production in audio conferencing systems.

It is as though we took the brain of a director to create dynamic and professional video with no human intervention.



multiCAM SYSTEMS

VIDEO FOLLOWS AUDIO

multiCAM RADIO uses **audio detection to select the best camera shot** and to focus the speaker.

AI offers diversity to produce a **broadcast quality** video automatically.

EASY-TO-SETUP

RADIO

Once system is connected,
it takes 30 min. to configure.

1. **Worskpace design**
   A basic overview of your studio that becomes an interactive map for Semi-Automated mode (click on a microphone to force the system to focus on a specific speaker)

2. **Audio Console**
   Just select your IP Console from the list (Axia, DHD, Lawo,...) or declare any AOIP channel (Dante, Livewire, Wheatnet,...)

3. **Camera presets**
   Create your camera shots for each microphones and the AI will pickup the good one at the right moment according to speaking detection.

SOFTWARE & **HARDWARE**

RADIO

A large choice of server boxes

- up to 4x NDI / IP sources
- up to 4x SDI sources
- up to 8x SDI sources

Expand number of cameras by using a video matrix controlled by multiCAM system.

Choose “MULTIROOM” option to use only one server for multiple studios and configurations.

INTEGRATED **AUDIO CONSOLES**

multiCAM is compliant with all major brands

DHD.audio Wheatstone WP Dante

AXIA AES67 Livewire+ RAmi LAWO

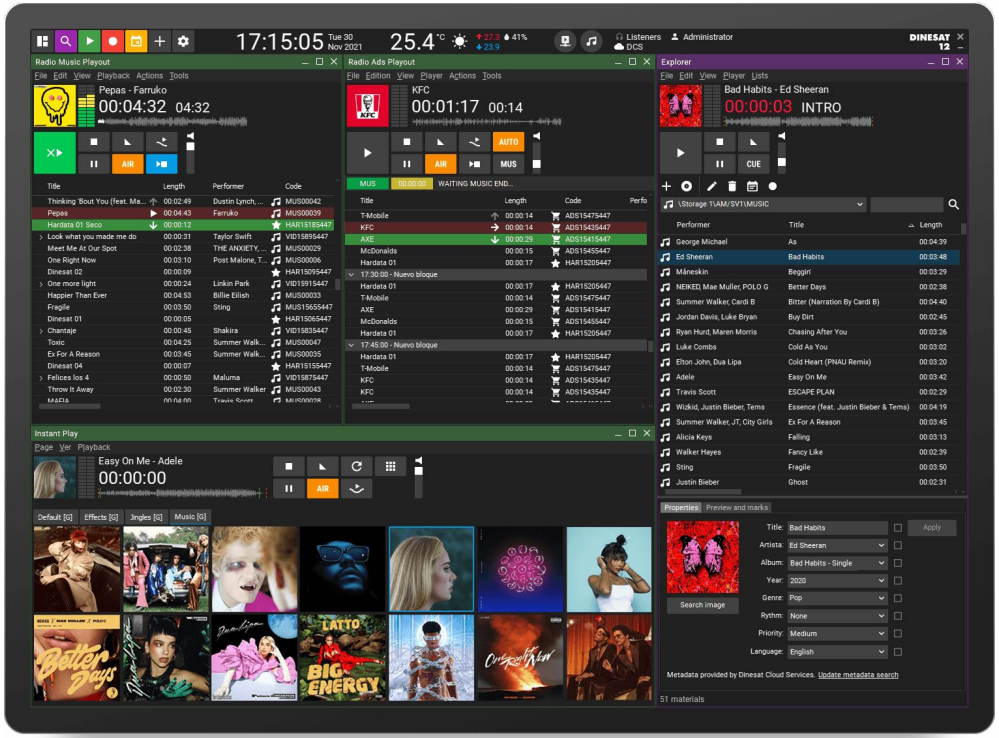
multiCAM is compliant with all major brands



RCS

DALET

ZENON MEDIA

WinMedia

WIDEORBIT

DAViD systems

NETIA

ENCO

INTEGRATED **PTZ CAMERAS**

multiCAM is compliant with all major brands/models

Lumens® SONY mCAM Panasonic Canon

Other brands/models are also integrated but not recommended due to a lack of reliable protocol:
BirdDog, PTZ Optics, VHD, Axis, Avonic

TOUCH & CONTROL

Anytime,
you can override audio

By clicking on a specific microphone on the interface, you force system to focus on the speaker. Release or wait few seconds to go back to automation.

GRAPHICS

Directly designed in the system

Import your logos, fonts and pictures. Design graphics according to the branding.

Graphic scenes automatically triggered by playout metadata.

A TURNKEY SOLUTION.
A POWERFUL VIDEO STATION.

multiCAM RADIO delivers all necessary functionalities for live video production and broadcasting.

PTZ CAMERA CONTROL
